Dear NASPGHAN Membership,

Thank you for considering my nomination to serve as Chair of the NASPGHAN Ethics Committee. NASPGHAN is my primary professional organization and I believe strongly in its mission, including support of policies and procedures to function in a highly efficient and ethical manner. Through participation on several NASPGHAN committees, educational symposia, and member-led initiatives I have worked within the organizational bounds while remaining centered on the purpose of what is being done and the people involved in the work.

Prior experience, spanning from high-school drum major to chief resident to General GI Section Chief, gave me the opportunity to be confronted with many ethical issues that needed to be addressed within the context of a group that had defined policies and aims. Regardless of the situation, principles of open communication, neutral assessment, and confidentiality/privacy were paramount. I feel comfortable with remaining methodical, fair, and direct in addressing these issues while considering the feelings of individuals involved.

Ethical challenges will continue to arise in the next decade that require ongoing attention from organizations. Refreshing policies such as recent work NASPGHAN has done with COI and societal papers, addressing new issues that arise with digital technology (eg. educating and communicating with social media, bias and plagiarism with artificial intelligence), and continuing to engage in discussion with organizational membership are priorities.

Serving as NASPGHAN Ethics Committee Chair would be a great honor and your consideration is appreciated.

Sincerely,
